
Wellbore History

GENERAL

Well 1/9-1 R is a re-entry of well 1/9-1 on a salt diapir structure located in the Feda Graben in the southern North Sea. The purpose of the re-entry was permanent abandonment.

OPERATIONS AND RESULTS

The suspended well 1/9-1 was re-entered (1/9-1 R) with the semi-submersible installation Ross Isle on 8 May 1987.

No cores were cut and no wire line fluid samples were taken.

The well was plugged and permanently abandoned on 17 May 1987.

TESTING

No drill stem test was performed.
