

Wellbore History

GENERAL

Well 34/7-16 R2 is located between the Statfjord and Snorre Fields on Tampen Spur in the Northern North Sea. It is a re-entry of well 34/7-16 R, which tested oil in the Brent Group and water in the Statfjord Formation. The purpose of the re-entry was plugging and permanent abandonment.

OPERATIONS AND RESULTS

Well 34/7-16 R was re-entered (34/7-16 R2) with the semi-submersible installation Vildkat Explorer on 23 June 1994.

The well was plugged and permanently abandoned on 5 July 1994.

TESTING

No drill stem test was performed.
