

Wellbore History

GENERAL

Well 25/4-6 S discovered gas and condensate in the Hugin Formation. After testing the well was suspended in August 1991 as a possible future producer. The objective of re-entry 25/4-6 SR was plugging and permanent abandonment.

OPERATIONS AND RESULTS

Wildcat well 25/4-6 S was re-entered (25/4-6 SR) with the semi-submersible installation Bideford Dolphin on 9 September 2003.

The well was plugged and permanently abandoned on 14 September 2003.

TESTING

No drill stem test was performed in the well.
