

Wellbore History

GENERAL

Well 34/7-19 R is a re-entry of well 34/7-19 on the Vigdis Middle structure south of the Snorre Field. Well 34/7-19 found oil in the Tarbert Formation and was suspended in December 1991 as a possible development well. The purpose of the re-entry was plugging and permanent abandonment.

OPERATIONS AND RESULTS

Well 34/7-19 was re-entered (34/7-19 R) with the semi-submersible installation Vildkat Explorer on 6 July 1994 and plugged.

No cores were cut and no wire line fluid samples were taken.

The well was permanently abandoned on 12 July 1994 as an oil appraisal.

TESTING

No drill stem test was performed.
