

## **Wellbore History**

## **GENERAL**

Well 2/7-20 R is a re-entry of the Embla discovery well 2/7-20. The aim was plugging and re-use as producer well on the Embla Field.

## **OPERATIONS AND RESULTS**

Well 2/7-20 was re-entered with the semi-submersible installation West Delta on 14 October 1991.

The well was plugged on 1 November 1991 and reclassified to development well 2/7-D-20.

## **TESTING**

No drill stem test was performed.
